

Construction Notice No. 8 November 2010

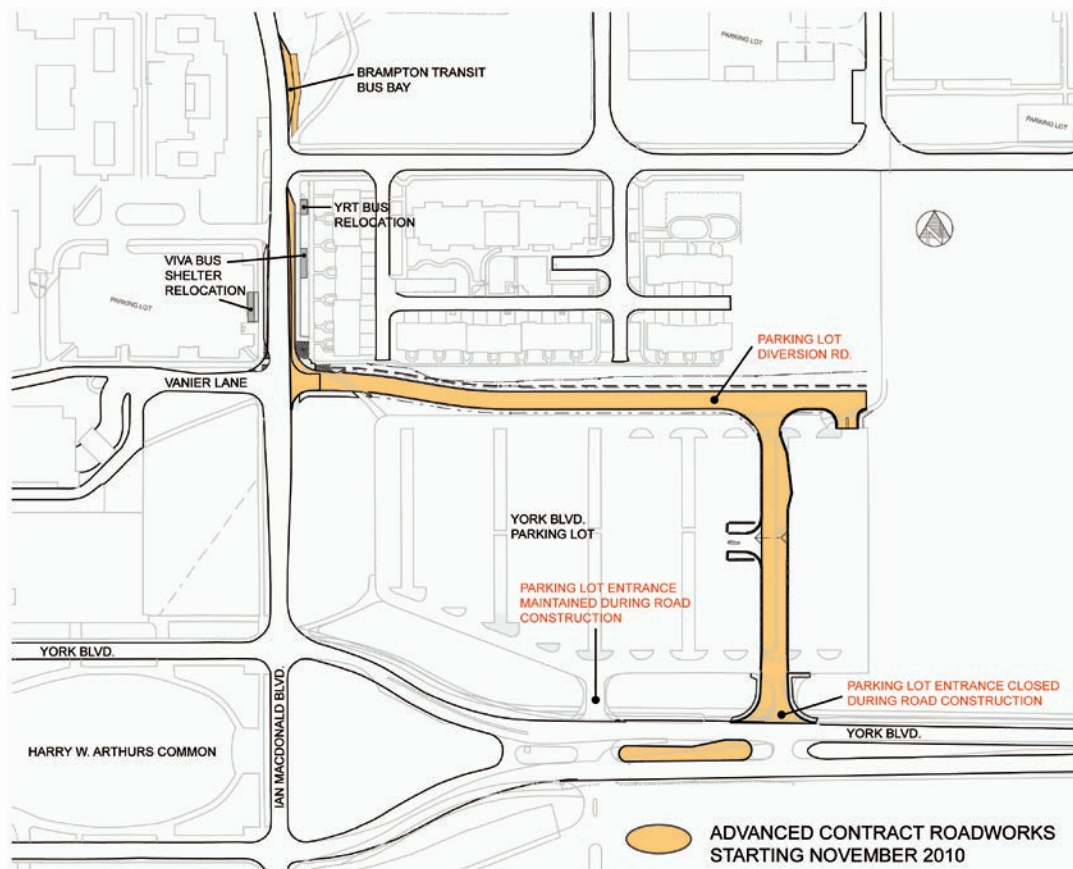

Advanced Temporary Road Construction for York University Station

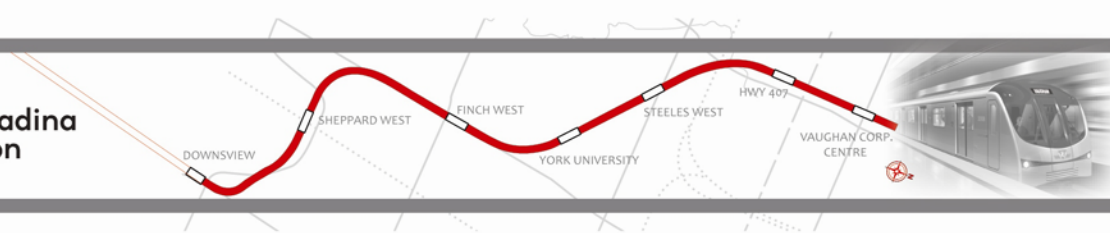

Work begins this month on the second phase of advanced roadway construction on York University's Keele campus in preparation of York University Subway Station construction, at the east end of the Harry W. Arthurs Common. These temporary roadways will allow transit vehicles to continue to serve the campus throughout the station construction period.

Construction this fall includes:

- constructing a temporary roadway through York Boulevard Parking lot, connecting Ian MacDonald Boulevard at Vanier Lane with York Boulevard at the signalized intersection of the TTC Busway;
- bus bay construction on Ian MacDonald Blvd north of Vanier Lane where VIVA, YRT and Brampton Transit (ZUM) buses will be stopping once the construction commences early 2011.
- sidewalk construction on the north side of Ian MacDonald Blvd in front of the Track and Field Centre.
- constructing facilities for the relocation of the Welcome Centre from York Boulevard to the northeast corner of The Pond Road and Ian MacDonald Boulevard.

Construction of these facilities is expected to be complete by late December 2010.

Work Hours

- Work will normally run from 7:00 a.m. to 7:00 p.m., Monday to Saturday.

VIVA, YRT and Brampton Transit Bus Stop Relocations

Existing VIVA, YRT and Brampton Transit (ZUM) services will continue to operate on Ian MacDonald Blvd in front of the Archives Building while these temporary works are underway, and until the start of the subway construction early in 2011. Bus stop relocation information will be posted on Ian MacDonald Blvd just prior to relocations.

Traffic Impacts and Pedestrian Safety

Traffic control personnel will be on campus to facilitate the safe movement of pedestrian, transit and vehicular traffic around the construction work areas. All existing roads will remain open and operational during the temporary road works, and access to the York Boulevard Parking Lot will be maintained on York Blvd.

Due to the nature of the work, motorists may face traffic delays. Disruption to transit services will be minimized as much as possible. We regret any inconvenience that may be caused as a result of this work.

Construction Vehicle Access

Construction vehicles will continue to access the campus via York Blvd from Keele Street. During deliveries of construction material and equipment, traffic movement on York Blvd. and Keele Street may be delayed or limited to a reduced speed. Your patience during this time is greatly appreciated.
